National Historical Publications and Records Commission Awards Johnson County Archives Grant

Upon the recommendation of the National Historical Publications and Records Commission (NHPRC), the Johnson County Archives and Records Management Department has been awarded a grant for Planning for Online Access (NHPRC Application No. RA-10016).

The goal of the planning project is to prepare a plan that with the advice of a consultant will develop proposed solutions for providing online access to information about the archival holdings in the Johnson County Archives. This includes public access to the archival database including: record search, document request, and record / document order fulfillment in a "one-stop" web-based environment.

On June 14, 2007 the Board of County Commissioners authorized the Johnson County Archives & Records Management Department, Information Technology Services, and Budget Department to accept a \$20,000 FY 2006 National Archives and Records Administration competitive grant award at no cost to the county and authorized the Budget Department's Grants Management Division to serve as the grant administrator.

The Archives will issue an informal request for proposal for consulting services later this year. For more information regarding this grant contact the Archives & Records Management Department.
